Education

University of Illinois Urbana-Champaign

Masters in Computer Science, Specializing in AI

May 2027 | CGPA: 3.77/4.00

Champaign, IL

SRM Institute of Science and Technology

B.Tech in Computer Science Engineering, Specialization in AI & ML

May 2023 | CGPA: 9.41/10.0

Chennai, India

Experience

Morgan Stanley | Parametric

June 2026 - Aug 2026

Platform Implementation Intern

Seattle, WA, USA

- Built a **Portfolio Manager AI Chat POC** (Python, Flask, JS) utilizing an enterprise AI gateway, OKTA-SAML auth, and multi-model routing. (Internship Capstone)
 - POC aims to Reduced client meeting prep time from **1-2 days to minutes** by enabling PMs to instantly retrieve account-specific insights on trades, tax-loss harvesting, bond maturities and more
- Engineered a **Python release automation pipeline** with AI-generated summaries, accelerating stakeholder delivery from **1.5 weeks to same-day distribution**.
 - Integrated a **SFMC email-generation AI agent** to produce plug-and-play, Outlook-compatible sprint communications.
- Enhanced a **Python-based Salesforce reconciliation script** with robust data validation, successfully **replacing the legacy version** in the team's weekly workflow.
- Mapped **51 Tableau dashboard requirements** to Salesforce and Jira datasets to define SLA, workload, and backlog-aging metrics.
 - Designed **2 dashboards**, using the above, for efficient metrics highlight .
- Resolved **50+ enterprise platform cases** across Salesforce, Marketing Cloud, Tableau, Seismic and Workfront to support access provisioning, data corrections, and system health.
- Delivered a business-critical **SFMC bulk email deployment to 2,000+ clients** using AMPscript and dynamic HTML, ensuring **strict SLA compliance** for time-sensitive account changes.

Barclays, UK

July 2023 - Aug 2025

Salesforce Marketing Cloud Developer / BA3 -> BA4

Pune, MH, India

- Developed automations in SFMC's Email and Automation Studios, leveraging core platform features to **increase operational efficiency by 5x**.
- Led a team of 2-5 developers** in designing and implementing scalable marketing solutions within SFMC.
- Developed and managed **end-to-end execution of campaigns across marketing and servicing emails**, including requirements gathering, technical architecture, design, and deployment.
- Received **25+recognitions** from Directors, Managers and CDMs and PWR Owners
- Maintained **Site-Switching API** to enable automatic failover between SFMC stacks, ensuring high availability and minimal downtime.
- Developed **AMPscript, SQL queries, and dynamic content** for emails and audience segmentation.
- Worked closely with **stakeholders to align marketing campaigns and servicing projects** with overall business goals and priorities.
- Made **architectural changes to existing automation** to improve the **operational efficiency** and to **mitigate the risks** associated with human error.
- Developed and deployed **tracking automations for the reporting**.
- Conducted A/B testing** and data analysis to optimize campaign performance.
- Managed **housekeeping activities for 3 business units by identifying and removing outdated, invalid, and inactive customers** based on different criteria.

Projects

SidelineSight

March 2026

- Built a **real-time adaptive sports interface dashboard** utilizing complex data processing.

IlliniRide

March 2026

- Developed a web-based **campus carpooling database application**.

Bugcatcher Joey | HackIllinois 2026 Project

Feb 2026

- Engineered a AI Enabled Pokemon battle team picker for **HackIllinois 2026 hackathon**.

ReServe

Nov 2025

- Built a food waste management web-app for student dinnig halls and local food hubs using **React, JS and MongoDB**

HyperSafety: Employee Mask Detection System

Mar 2022

- Designed an employee management app with **ML-powered image detection** for mask compliance, built on a **Flutter frontend, NodeJS/MySQL backend**, and dedicated ML service.

Paper Publication

- **VectorQuest: A Faster and Better Open-Domain Question-Answering System** [Springer In. Journal](#)
 - Explored the use of **vector databases** instead of pandas' data frames for training large AI-ML Models, **reducing training costs by 50x**.

Skills

SF Certifications:	Salesforce Certified (Email Specialist, AI Associate, AI Specialist)
Languages:	Python, JavaScript, SQL, AMPscript, SSJS, HTML, CSS
AI & Data:	Agentic AI workflows, Generative AI/LLMs, Machine Learning, NLP, Pandas
Frameworks & Tools:	Flask, Node.js, Flutter, Git, Jira, Agile
Platforms & DBs:	Salesforce CRM, Salesforce Marketing Cloud, Tableau, MySQL, MongoDB, SQL Server, Oracle
